☐ QAAMS   ☐ TTANGO   ☐ COVID-19/4-PLEX POCT   ☐ WBC DIFF POCT   ☐ i-STAT POCT

Application for Operator Training

Basic Operators can:
- client test
- quality test

Advanced Operators can:
- client test
- quality test
- conduct basic operator training sessions for Health Organisation/Service staff

Unless your role requires you to train others, we recommend enrolling first in Basic Operator training. Then, after you've obtained that level of competency, you can evaluate whether to upgrade to an Advanced Operator.

We suggest talking to your Health Organisation/Service Manager and/or Sexual Health Coordinators about this decision before you apply, and to obtain their authorisation of your request (as required in the application form).

Privacy Policy

The information provided by you in this form or learning management system is being collected by, or on behalf of, Flinders University's International Centre for Point-of-Care Testing ("the Centre") and its collection, use and storage will be governed by Flinders Privacy Policy. The information you provide will be used by the Centre to: a) facilitate your education and training, b) report required de-identified metrics to State, Territory and Federal Governments that have funded this project and c) report required identifiable metrics to program coordinators for quality management purposes. Please contact the Centre team if you require further information.

User Consent

By completing this form or logging onto the learning management system, I consent to the Centre collecting and using the information contained in this form for the purposes set out above and subject to the Flinders Privacy Policy.
